#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference	FOR FURTHER ACT	CTON	See Form PCT/IPEA/416		
325.0235PCT	FOR FURTHER ACT	110N	See Form FC1/#EA/410		
International application No.	International filing date (a	lay/month/year)	Priority date (day/month/year)		
PCT/US04/32788	05 October 2004 (05.10.2	.004)	30 October 2003 (30.10.2003)		
International Patent Classification (IPC)	or national classification an	d IPC			
IPC(7): F25J 3/02, 3/00 and US Cl.: 62/	657, 628, 625, 621				
Applicant					
FLUOR CORPORATION					
1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.					
2. This REPORT consists of	a total of $\frac{3}{2}$ sheets, incl	uding this cover shee	et.		
3. This report is also accomp	anied by ANNEXES, co	mprising:			
a. (sent to the applica	nt and to the Internation	al Bureau) a total of	sheets, as follows:		
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).					
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.					
b. (sent to the Intern	national Bureau only) a t	otal of (indicate type	and number of electronic carrier(s))		
, containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).					
4. This report contains indica	ations relating to the follo	owing items:			
	asis of the report	<b></b>			
	riority				
Box No. III No		ion with regard to no	ovelty, inventive step and industrial		
	ack of unity of invention	•			
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
[	ertain documents cited	•	0		
Box No. VII Co	ertain defects in the international application				
Box No. VIII Co	ertain observations on the	e international applic	ation		
Date of submission of the demand		Date of completion	of this report		
03 March 2005 (03.03.2005)		02 February 2006 (02.02.2006)			
Name and mailing address of the IPEA/ US		Authorized officer	,		
Mail Stop PCT, Attn: IPEA/US Commissioner for Patents		Villiam C. Doerrler	· VII AL )		
P.O. Box 1450 Alexandria, Virginia 22313-1450		O. Doctrici	1 10		
Facsimile No. (571) 273-3201		Telephone No. (571)	) 272-3750		

Form PCT/IPEA/409 (cover sheet)(April 2005)

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.	
PCT/US04/32788	

Вох	k No.	I Basis of the report
1.	With	regard to the language, this report is based on:
		a translation of the international application into English, which is the language of a translation furnished for the purposes of:
		international search (under Rules 12.3 and 23.1(b))
	I	publication of the international application (under Rule 12.4(a))
	1	international preliminary examination (under Rules 55.2(a) and/or 55.3(a))
	furnisi	regard to the elements of the international application, this report is based on (replacement sheets which have been shed to the receiving Office in response to an invitation under Article 14 are referred to in this report as "origin ally filed" are not annexed to this report):
	$\boxtimes$	the international application as originally filed/furnished
	$\boxtimes$	the description:
		pages 1-15 as originally filed/furnished pages* NONE received by this Authority on
		pages* NONE received by this Authority on  pages* NONE received by this Authority on
	<del></del> 2	
		the claims: pages 16-18 as originally filed/furnished
		pages* NONE as amended (together with any statement) under Article 19
		pages* NONE received by this Authority on
		pages* NONE received by this Authority on
	$\boxtimes$	the drawings:
	لنـــــ	pages 1-3 as originally filed/furnished
		pages* NONE received by this Authority on
	_	pages* NONE received by this Authority on
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3.	$\boxtimes$	The amendments have resulted in the cancellation of:
		the description, pages None
		the claims, Nos. None
		the drawings, sheets/figs None
		the sequence listing (specify): None
		any table(s) related to the sequence listing (specify): None
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
		the description, pages
		the claims, Nos
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to the sequence listing (specify):
* /	If iten	m 4 applies, some or all of those sheets may be marked "su perseded."

International application No. PCT/US04/32788

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned statem applicability; cita	ent under Article 35(2) with regard to novelty, inventive step or industria ations and explanations supporting such statement	11 
1. Statement Novelty (N)	Claims 1-20 Claims NONE	YES NO
Inventive Step (IS)	Claims 1-20 Claims NONE	YES NO
Industrial Applicabil	lity (IA) Claims <u>1-20</u> Claims <u>NONE</u>	YES

2. Citations and Explanations (Rule 70.7)

Claims 1-20 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a fluidly connected absorber and distillation column with the ratio of inputs to the absorber being manipulated to control the output at the bottom of the distillation column. The prior art shows controlling the flow into a column to control the flow out of the column, but not controlling the input to an absorber to control the bottom output of an associated distillation column. The prior art also shows fluidly connected absorbers and distillation columns. However, there is no teaching to combine the fluidly connected absorber/distillation columns with the controlled feed systems to control the output at a downstream column.

Claims 1-20 meet the criteria set out in PCT Article 33(4), and thus possess industrial applicability because the subject matter claimed can be made or used in industry.
